

IO1: Design and development of the e-Platform with e-training resources and 12 case studies. Task: Case study Template

Case study template: Vocational Training Programme

<i>Partner Name</i>	Lawton School s.l.	<i>Case Study Number 1</i>
<i>Case Study Title Vocational Training programme title</i>	CAPSA - Consume only what's essential Circular Economy and Zero Waste	
<i>Field</i>	Agriculture, dairy products production and processing	
<i>Short description of training programme (duration, aim, objectives, target group, EQF level)</i>	The main objective of this programme is to consume only what is essential, reducing waste generation at its source and when this is not possible, ensure that resources are recovered to remain in the economy for as long as possible. This is integrated in the company's Comprehensive sustainability programme and it is CAPSA's contribution towards promoting a circular economy model, moving ever closer to reaching its Zero Waste objective.	
<i>Mode of delivery (online, F2F, platform etc.)</i>	Presential and online	
<i>Assessment method used (i.e. questionnaire, project work, practical evaluation etc.)</i>	Project work with both direct and online contact, assessing on the company's commitment with sustainability and circular economy in their daily practices	
<i>List of modules and subunits of programme</i>	N/A	
<i>Elaborate on information provided for:</i> - waste management, - waste minimisation - circular economy - resource management - etc.	Central Lechera Asturiana (CAPSA) is a large regional cooperative of milk producers, one of the biggest in Spain who, besides recollecting and treating milk and its derivatives, is strongly committed with their partners (local and regional producers) to reintegrate their produce in the food chain in a most sustainable and eco/friendly manner, therefore developing an extensive and detailed waste management programme, as well as a very thorough resource management.

<i>Case studies used, if any</i>	Zero Waste and Consume Only What's Essential Programme
<i>Is this training programme innovative? If yes, how?</i>	Yes, in a way, because they don't limit themselves to providing milk and other dairy products. They try and make sure there is some form of return to their products. Through awareness and teamwork, they have been reducing waste generation by more than a quarter, integrating and transforming 95% of their waste into new value-added resources.
<i>Which technologies are used in, if any?</i>	Management of natural resources
