

IO1: Design and development of the e-Platform with e-training resources and 12 case studies. Task: Case study Template

1) Case study template: Vocational Training Programme

<i>Partner Name</i>	Panevėžys Labour Market Training Centre	<i>Case Study Number_02</i>
<i>Case Study Title Vocational Training programme title</i>	Panevėžys Labour Market Training Centre	
<i>Field</i>	Training sector	
<i>Short description of training programme (duration, aim, objectives, target group, EQF level)</i>	We hadn't found any food waste management VET programme in Lithuania, still found reasonable to share the on-going widely known training programme - initiative " Sincerely food ". The initiative (in Lithuania it is implemented by Lithuanian Consumer Institute) is dedicated to households (representatives of educational sector), but in some cases also is adopted for professional training.	
<i>Mode of delivery (online, F2F, platform etc.)</i>	Blended	
<i>Assessment method used (i.e. questionnaire, project work, practical evaluation etc.)</i>	Interactive Tests/Quizzes	
<i>List of modules and subunits of programme</i>	Impact on the nature Food- energy waste Carbon footprint Social responsibility Tips to participate in the responsible food preparation-use process	
<i>Elaborate on information provided for: - waste management, - waste minimisation - circular economy - resource management - etc.</i>	All listed	
<i>Case studies used, if any</i>	-	
<i>Is this training programme innovative? If yes, how?</i>	Yes, include interactive games/ knowledge transfer tools.
